Engineering, Construction and Management Solutions

Hard Hat Services Wins Business Achievement Award

Hard Hat Services recently won a Silver Medal Business Achievement Award from the Environmental Business Journal (EBJ) in the small firm category. The company received the award for its rapid revenue growth in the environmental market. This is the first time Hard Hat Services has entered the EBJ competition.

Hard Hat Services is a full-service engineering, construction, and project management company that focuses on the industrial market. Founded in 2000, the operation has grown to five locations, including offices in Chicago, Milwaukee, Kansas City, St. Louis and Chesterton, Ind. The company attributes this growth to excellent customer service, an experienced team of professionals, and an ability to see things from the customers' perspective.

“We focus on our customer's needs, and we respond quickly to those needs,” said Tom Blair, P.E., president of Hard Hat Services. “By using common sense and a client-centered approach on each project, we will continue to deliver success for our industrial clients.”

For more information, call (877) 637-9470 or visit the firm's website at www.hardhatinc.com.
